Frontend Engineer with 4+ years of experience building scalable, user-centric web applications. Specialized in React, Next.js, TypeScript, and Tailwind CSS, with a strong focus on performance, maintainability, and modern frontend architecture. Passionate about continuous learning and contributing to high-impact international projects. I am deeply passionate about technology, web development, and game design as well.

Experience

Vairix

2022 - Present

- Worked collaboratively within Agile teams with international stakeholders to develop high-quality front-end solutions and translate business requirements into scalable architectures.
- Implemented the client-side architecture for conversational tools (agentic chats), managing real-time response streaming, thread handling, and complex dynamic states using React, Next.js, TypeScript, and Vercel AI SDK.
- Led the strategic migration of the marketing architecture to a headless CMS (Builder.io) for a high-demand transactional platform.
- Spearheaded the technical challenge of porting native (iOS/Android) user experiences to highly responsive web applications, optimizing overall performance.
- Developed dynamic interfaces for a gamified content platform, integrating robust data validation systems (Zod, Formik) and collaborating closely with backend teams for efficient API consumption (NestJS).

AvenMess

2020 - 2022

- Developed and maintained custom web solutions using WordPress for small and medium-sized businesses.
- Autonomously managed the full project lifecycle: from requirements gathering and theme customization (UI/UX) to performance optimization (Core Web Vitals) and deployment.

Education

2019-2021

UTN FRLP

Systems Information Engineering | 2nd year

2021
